

CLASS 19+20: LEARNING RESOURCES

Tailwind CSS	React Hook Form	■ AI Workflow
--------------	-----------------	---------------

01 Tailwind CSS Official Documentation

Tailwind CSS Docs — Core Concepts

<https://tailwindcss.com/docs/styling-with-utility-classes>

The official introduction to utility-first styling. Explains the philosophy behind Tailwind and why it scales well for teams. Read this first.

Tailwind Play — Interactive Playground

<https://play.tailwindcss.com>

Live in-browser editor. Type classes, see results instantly. Use this to test ANY class combination before committing it to your project — fastest feedback loop available.

Tailwind Responsive Design Docs

<https://tailwindcss.com/docs/responsive-design>

Complete breakpoint reference (sm, md, lg, xl, 2xl) with the exact pixel values for each. Bookmark this for whenever you forget a breakpoint size.

Tailwind Hover, Focus & Other States

<https://tailwindcss.com/docs/hover-focus-and-other-states>

Every state prefix available: hover, focus, active, disabled, and many more advanced ones (group-hover, peer-focus). Covers the patterns from class plus more advanced combinators.

Tailwind CSS IntelliSense — VS Code Extension

<https://marketplace.visualstudio.com/items?itemName=bradlc.vscode-tailwindcss>

Autocomplete for class names, colour previews inline, and linting for invalid classes. Install this — it dramatically speeds up writing Tailwind.

02 React Hook Form Official Documentation

React Hook Form — Get Started

<https://react-hook-form.com/get-started>

Official quickstart. Covers register, handleSubmit, and basic validation with live editable examples. Directly matches what was covered in class.

React Hook Form — Validation Rules

<https://react-hook-form.com/docs/useform/register>

Full list of validation rules: required, min, max, minLength, maxLength, pattern, validate (for custom functions). Use this when you need a rule not covered in class.

React Hook Form — Error Messages

<https://react-hook-form.com/docs/useform/formstate>

Covers the formState object in depth: errors, isSubmitting, isDirty, touchedFields. Useful once you want more advanced UX, like disabling submit until the form is touched.

03 YouTube Tutorials

Tailwind Labs — Official YouTube Channel

Search YouTube: "Tailwind Labs official channel"

Run by the Tailwind creators. Short, practical videos building real components live. Best source for seeing "how the experts think" when choosing utility classes.

Net Ninja — Tailwind CSS Tutorial Series

Search YouTube: "Net Ninja Tailwind CSS tutorial"

A structured multi-part series covering setup through advanced responsive patterns. Good for a slower-paced second pass through today's material.

Web Dev Simplified — React Hook Form Tutorial

Search YouTube: "Web Dev Simplified React Hook Form"

Clear walkthrough of React Hook Form with validation examples. Reinforces the register/handleSubmit/errors pattern from class with a different example form.

Codevolution — React Hook Form Playlist

Search YouTube: "Codevolution React Hook Form"

A longer playlist covering React Hook Form from basics to advanced patterns like nested objects and dynamic fields — useful if your mini project grows a more complex form later.
