

CLASS 19+20 HOMEWORK — SOLUTIONS

XELI AI Labs • Instructor Reference • Do Not Distribute

INSTRUCTOR USE ONLY. As with the mini project, there is no single correct visual output — grade on whether the technical requirements are met (Tailwind usage, responsive behaviour, validation logic), not on design taste.

Part 0: Drill Answer Key

#	Accepted Answer	#	Accepted Answer
1	p-4	11	border-2 border-gray-300
2	py-6 px-3	12	text-gray-500 text-sm
3	text-white bg-blue-900	13	px-4 py-2
4	font-bold text-center text-lg	14	w-full
5	rounded-lg shadow-md	15	grid grid-cols-1 lg:grid-cols-3
6	flex items-center justify-center	16	text-2xl mb-4
7	flex justify-between	17	focus:ring-2 focus:ring-indigo-300
8	grid grid-cols-2 gap-4	18	disabled:opacity-50 disabled:cursor-not-allowed
9	bg-blue-500 hover:bg-blue-600	19	space-y-4
10	w-12 h-12 rounded-full	20	hover:-translate-y-1 hover:shadow-lg transition-all

Accept reasonable equivalents: e.g. for #17, focus:ring-2 with or without focus:outline-none, any indigo/blue shade. For #20, transition-transform + transition-shadow separately is equally correct.

PROJECT 1 — CHECKS Tailwind Restyle 50 pts

REFERENCE EXAMPLE — Responsive Card Grid

```
// HomePage.jsx — what a correct submission looks like
const HomePage = () => (
  <div className="max-w-7xl mx-auto px-4">
    <h1 className="text-2xl font-bold my-6">Popular Movies</h1>
    <div className="grid grid-cols-1 md:grid-cols-2 lg:grid-cols-3 xl:grid-cols-4 gap-4">
      {movies.map(movie => (
        <Link key={movie.id} to={` /movie/${movie.id}`}
        className="bg-white rounded-xl shadow-md overflow-hidden hover:shadow-lg hover:-translate-y-1 transition-all">
          <img className="w-full h-48 object-cover" src={...} />
          <div className="p-3">
            <h3 className="font-bold text-base">{movie.title}</h3>
            <p className="text-gray-500 text-sm">stars {movie.vote_average}</p>
          </div>
        </Link>
      ))}
    </div>
  </div>
);
```

MARKING NOTES

- KEY CRITERION: no .css files except index.css (which should only contain the Tailwind import)
- Deduct 15 pts if grid is NOT responsive (same column count at all screen sizes)
- Deduct 10 pts if no hover states present on cards or buttons
- Deduct 5 pts if spacing is inconsistent (random px values via inline styles mixed with Tailwind)
- Accept any reasonable colour scheme — grade structure and responsiveness, not taste
- Bonus: dark mode (+5), animations (+5)

PROJECT 2 — CHECKS Validated Form 50 pts

REFERENCE EXAMPLE — SearchForm.jsx

```
import { useForm } from 'react-hook-form'; const SearchForm = ({ onSearch }) => { const { register,
handleSubmit, formState: { errors, isSubmitting } } = useForm(); const onSubmit = async (data) => {
onSearch(data.query); }; return ( <form onSubmit={handleSubmit(onSubmit)} className='flex flex-col gap-2
max-w-md mx-auto'> <div className='flex gap-2'> <input className={`flex-1 p-2 border rounded-lg
${errors.query ? 'border-red-500' : 'border-gray-300'}`} {...register('query', { required: 'Please enter a
search term', minLength: { value: 2, message: 'Must be at least 2 characters' } })} /> <button type='submit'
disabled={isSubmitting} className='px-4 py-2 bg-indigo-600 text-white rounded-lg disabled:opacity-50'>
{isSubmitting ? '...' : 'Search'} </button> </div> {errors.query && <p className='text-red-500
text-sm'>{errors.query.message}</p>} </form> ); };
```

MARKING NOTES

- KEY CRITERION: form uses useForm() — no manual useState + onChange for form fields
- Deduct 15 pts if handleSubmit() is not used (form would submit without validation)
- Deduct 10 pts if fewer than 2 validation rules are present
- Deduct 10 pts if error messages are generic ("Invalid") instead of descriptive
- Deduct 5 pts if conditional border styling is missing
- Deduct 5 pts if isSubmitting is not used on the submit button
- If SearchForm: verify onSearch actually filters the displayed data
- If ContactForm: verify console.log shows the complete data object on valid submit
- AI-generated regex is fine — ask student to explain what their regex matches

Grading Summary

Component	Key Check	Auto-fail	Pts
Tailwind Restyle	Responsive grid · hover states · no custom CSS	Fixed-column grid only	50
Validated Form	useForm · 2+ rules · custom messages · isSubmitting	No handleSubmit wrapper	50

Grade on technical correctness (responsive behaviour, validation logic) not visual taste.
